

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Goldman Sachs Global CORE® Equity Portfolio

Legal entity identifier:
CBSHN70011P7IWHG6F03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser implements an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria"). This consists of: (i) the use of climate metrics to address climate transition risk as set forth below; (ii) exclusionary screens.

The Portfolio seeks to promote a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics. Where exceptional circumstances exist (including, but not limited to, high market volatility, exceptional market conditions, market disruptions) that result in this target not being achieved, the Investment Adviser will seek to adjust the Portfolio to adhere to the target as soon as reasonably practicable and in the best interests of Shareholders. Please note that the Reference Portfolio/Benchmark is not an ESG benchmark and that the Portfolio is not managed in view of achieving the long-term global warming objectives of the Paris Agreement.

As part of the ESG investment process, the Investment Adviser will avoid investing in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction and/or production of certain fossil fuels (including thermal coal or oil sands);
- production of and/or involvement in tobacco products

Information on the criteria applied when assessing the aforementioned revenues may be found at the following [link](#).

The Portfolio will also seek to exclude from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption) using the proprietary approach to assess good governance practices described below as well as data provided by third party vendors.

Adherence to these ESG Criteria will be based on thresholds pre-determined by the Investment Adviser in its sole discretion and will be applied to proprietary data and/or data provided by one or more third party vendor(s). The Investment Adviser will rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. The Investment Adviser, in its sole discretion, retains the right to disapply data provided by third party vendors where it deems the data to be inaccurate or inappropriate. In some cases, data on specific companies may not be available or may be estimated by the Investment Adviser using internal processes or reasonable estimates. Potential omissions from the ESG Criteria may include but are not limited to newly listed companies to which a third party vendor may not yet have data mapped. In the course of gathering data, vendors may make certain value judgements. The Investment Adviser does not verify those judgements, nor quantify their impact upon its analysis. The Investment Adviser in its sole discretion may periodically update its screening process, amend the type of activities that are excluded for investment or revise the thresholds applicable to any such activities.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The following indicators are used to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio:

- The level of the climate transition risk of the Portfolio and the Reference Portfolio/Benchmark according to the Investment Advisers' proprietary climate metrics.
- % of companies in the Portfolio deriving significant revenues from:
 - production of and/or involvement in controversial weapons;
 - extraction and/or production of certain fossil fuels (including thermal coal or oil sands);
 - production of and/or involvement in tobacco products
- % of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the Portfolio does not commit to making sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable as the Portfolio does not commit to making sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- How have the indicators for adverse impacts on sustainability factors been taken into account?

Not applicable.

- How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

Yes, this Portfolio considers principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG Criteria outlined above. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. Additional information on which PAIs are taken into account are available on our website and will also be available in the Portfolio's annual report pursuant to SFDR Article 11.

No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investments objectives and risk tolerance.

The Investment Adviser implements the ESG Criteria on a binding basis into its investment process, as described above.

In addition to applying the ESG Criteria as set forth above, the Investment Adviser may also assess investee companies against certain social, environmental and governance indicators through its bottom-up stock selection and portfolio construction process. These indicators may include, but are not limited to, environmental impact, labour satisfaction, reputational concerns, governance and management incentives. The Investment Adviser, in its sole discretion, may periodically update the indicators used in the investment decision-making process of the Portfolio. The indicators applied by the Investment Adviser are assessed in reliance on one or a number of third party ESG vendors. The Investment Adviser, in its sole discretion, retains the right to disapply data and/or ratings provided by third party vendors where it deems the data and/or ratings to be inaccurate or inappropriate.

Additionally, this Portfolio leverages the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives are continually reviewed, enhanced and monitored to ensure they incorporate current issues and evolving views about key environmental, social, and governance topics. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates an annual Focus List, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

- The Portfolio implements the exclusionary screens as set forth in the ESG Criteria, further described above.
- The Portfolio aims to target a lower climate transition risk relative that is lower or equal to the Reference Portfolio/Benchmark using proprietary climate metrics.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The ESG Criteria is not designed to reduce investments considered prior to the application of this strategy by a committed minimum amount. The exclusionary screens are intended to ensure that issuers engaged in certain activities are entirely excluded from the Portfolio and is expected to remove between 0-5% of the Reference Portfolio/Benchmark.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The Portfolio leverages Goldman Sachs Asset Management's proprietary approach to identifying and evaluating global norms violators and issuers that may be engaged in poor governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

This proprietary approach seeks to identify, review, evaluate and monitor companies that are flagged by external data providers as being in violation of, or otherwise not aligned with, the United Nation Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as well as companies that have received high controversy scores (including significant governance controversies, severe labour rights controversies and severe tax compliance controversies). Following review of these external data inputs, companies that the Investment Adviser believes to have an ongoing and serious violation and/or are considered to not be following good governance practices with insufficient remediation will be excluded from the Portfolio. This list of companies will be reviewed on at least a semi-annual basis. The Investment Adviser may not be able to readily sell securities that are intended for exclusion from the Portfolio based on this review (for example, due to liquidity issues or for other reasons outside of the Investment Manager's control), however, will seek to divest as soon as possible in an orderly manner and in the best interests of Shareholders.

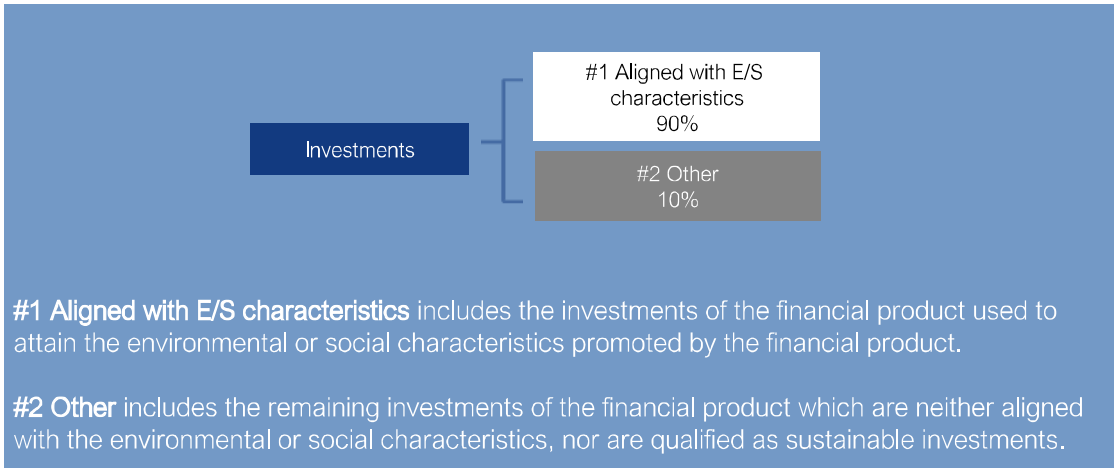

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

Based on historical data, it is expected on average a minimum of 90% of investments will be aligned to the environmental and/or social characteristics promoted by this Portfolio, as noted above. Based on the daily average over the next calendar year, up to 10% may be held in cash and cash equivalents such as equity index futures, FX spot and FX forwards where applicable. In the event there are significant investments in hedged share classes relative to the unhedged share classes, the proportion of investments aligned with the environmental and/or social characteristics may fall below the threshold set out above as the allocation to cash and/or derivatives may increase.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

This question is not applicable

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio does not currently commit to invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy is 0%. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or Nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What is the minimum share of investments in transitional and enabling activities?

As the Portfolio does not commit to invest any “sustainable investment” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Portfolio promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Portfolio does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

This question is not applicable as the Portfolio does not commit to make socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” include cash and cash equivalents for liquidity purposes and/or equity index futures, FX spot and forwards for hedging purposes. These may be used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio. The percentage shown is expected to be the daily average over the next calendar year which may be held in these instruments based on historical data but the actual percentage may vary from time to time, in particular, if there is a significant increase in investments in hedged share classes relative to the unhedged share classes in the Portfolio.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:
